

**Mahatma Gandhi Mission's
COLLEGE OF ENGINEERING
Department of Computer Science & Engineering**

**STUDENT FEEDBACK OF INTERNSHIP
(TO BE FILLED BY STUDENTS AFTER INTERNSHIP COMPLETION)**

Student Name: Rajsingh Ganeshsingh Thakur

Industrial Supervisor: Mr. Darshan Dhapade & Mr. Mohammed Hussain

Title : Development of a Dynamic Ride-Sharing and Carpooling Platform

Supervisor E-mail: springboardmentor211@gmail.com

Internship Is : Unpaid

Company/Organization : Infosys Springboard

Internship Address : Virtual Internship 6.0 (Batch 13)

Faculty/Coordinator: Ms. Savita S. Wagre

Department : Computer Science and Engineering (B.Tech-CSE-A)

Dates Of Internship : From 5th February 2026 To 3rd April 2026

Give a brief description of your internship work (title and tasks for which you were responsible) :

Internship Title: Java Full Stack Developer Intern – Development of a Dynamic Ride-Sharing and Carpooling Platform (Smart Ride Sharing System)

During my internship, I worked on the design and development of a full-stack web application named Smart Ride Sharing System. My responsibilities included developing responsive user interfaces using React.js, implementing backend functionalities with Java Spring Boot, integrating REST APIs, and managing database operations using MySQL and JPA Hibernate. I contributed to modules such as user registration and login, ride posting, ride booking, fare calculation, payment integration, notifications, reviews, and administrative monitoring. I also worked on JWT-based authentication, testing, debugging, and system integration to ensure secure and reliable application performance. This internship provided practical experience in full-stack web development, software engineering practices, and real-world project execution.

Was your internship experience related to your major area of study?

→ Yes, to a large degree.

Indicate the degree to which you agree or disagree with the following statements.

This experience has:	Strongly Agree	Agree	No Opinion	Disagree	Strongly Disagree
Given me the opportunity to explore a career field	☒				
Allowed me to apply classroom theory to practice	☒				
Helped me develop my decision-making and problem-solving skills	☒				
Expanded my knowledge about the work world prior to permanent employment	☒				
Helped me develop my written and oral communication skills	☒				
Provided a chance to use leadership skills(influence others , develop ideas with others, stimulate decision-making and action)	☒				
Expanded my sensitivity to the ethical implications of the work involved	☒				
This experience has:	Strongly Agree	Agree	No Opinion	Disagree	Strongly Disagree
Made it possible for me to be more confident in new situations	☒				
Given me a chance to improve my inter personal skills	☒				
Helped me learn to handle responsibility and use my time wisely	☒				
Helped me discover new aspects of myself that I didn't know existed before	☒				
Helped me develop new interests and abilities	☒				
Helped me clarify my career goals	☒				
Provided me with contacts which may lead to future employment	☒				
Allowed me to acquire information and/or use equipment not available at my Institute	☒				

In the Institute internship program, faculty members are expected to be mentors for students. Do you feel that your faculty coordinator served such a function? Why or why not?

→ Yes, my faculty coordinator, Ms. Savita S. Wagre, effectively served as a mentor throughout the internship program. She provided continuous guidance, monitored my progress regularly, clarified technical and project-related queries, and offered valuable suggestions whenever required. Her support helped me stay focused on project objectives, improve my problem-solving abilities, and successfully complete the internship tasks. The timely feedback and encouragement provided by her contributed significantly to my learning experience and overall professional development during the internship.

How well were you able to accomplish the initial goals, tasks and new skills that we reset down in your learning contract? In what ways were you able to take a new direction or expand beyond your contract? Why were some goals not accomplished adequately?

→ I was able to accomplish most of the goals and tasks defined in my learning contract successfully. During the internship, I enhanced my knowledge of full-stack web development by working on the Smart Ride Sharing System using technologies such as React.js, Java Spring Boot, MySQL, REST APIs, JWT Authentication, and JPA Hibernate. The project helped me develop practical skills in frontend development, backend integration, database management, authentication implementation, testing, and debugging while applying theoretical concepts to a real-world application.

Beyond the initial objectives, I expanded my learning by working on additional functionalities such as payment gateway integration, email notification services, role-based access control, admin dashboard development, and responsive user interface design. These experiences provided broader exposure to software engineering practices and improved my problem-solving, project management, and teamwork skills. Exploring these advanced features allowed me to gain a deeper understanding of modern web application development and industry-standard workflows.

Most of the planned goals were achieved effectively through continuous learning and practical implementation. However, some activities required additional time due to the complexity of integrating multiple modules and resolving technical challenges related to authentication, payment processing, and frontend-backend communication. Despite these challenges, the learning objectives were substantially fulfilled, and the internship significantly strengthened

my technical knowledge, confidence, and readiness for professional software development roles.

In what areas did you most develop and improve?

→ During the internship, I experienced significant growth in full-stack web development, particularly in frontend design, backend development, database management, and API integration. Working on the Smart Ride Sharing System improved my proficiency in React.js, Java Spring Boot, MySQL, JWT Authentication, and REST API development. I also enhanced my debugging, testing, problem-solving, and project management skills while implementing real-world application features. The internship strengthened my understanding of software development workflows and improved my ability to build secure, scalable, and user-friendly web applications.

What has been the most significant accomplishment or satisfying moment of your internship?

→ The most significant accomplishment of my internship was successfully developing and integrating the major modules of the Smart Ride Sharing System into a fully functional web application. Seeing features such as user authentication, ride posting, ride booking, payment processing, notifications, and the admin dashboard work together smoothly was highly satisfying. Successfully overcoming technical challenges related to frontend-backend integration and secure authentication gave me confidence in my technical abilities. Completing the project and gaining hands-on experience with industry-level technologies was one of the most rewarding aspects of the internship.

What did you dislike about the internship?

→ I did not experience any major drawbacks during the internship, as it provided a well-structured learning environment and valuable exposure to real-world software development practices. The internship offered opportunities to enhance technical skills, work on a practical project, and gain hands-on experience with modern technologies. The guidance, learning resources, and project-based approach made the experience both productive and rewarding. Overall, the internship was highly beneficial and contributed significantly to my professional and technical development.

Considering your overall experience, how would you rate this internship? (Circle one).

→ (Satisfactory / Good / Excellent)

Give suggestions as to how your internship experience could have been improved.(Could you have handled added responsibility? Would you have liked more discussions with your professor concerning your internship? Was closer supervision needed? Was more of an orientation required?)

→ Overall, the internship experience was highly beneficial and well organized. The learning resources, project structure, and guidance provided throughout the program were effective in helping me develop both technical and professional skills. I was able to complete my assigned responsibilities successfully and would have been willing to take on additional tasks or advanced modules if opportunities had been available.

Regular interactions with mentors and faculty coordinators were helpful, and the support provided was sufficient for project completion. While closer supervision was not necessary, additional technical workshops, live industry sessions, or collaborative discussions with professionals could further enhance the learning experience. Overall, the internship was well managed and provided valuable practical exposure to real-world software development practices.
